

Table I-D CCWE identifies the non-RCRA metal-containing fly ash, bottom ash, retort ash and baghouse waste from sources other than foundries, and the concentrations of their associated hazardous constituents which may not be exceeded by the extract of the waste or treatment residual for the allowable land disposal of such waste or residual. The specified concentrations shall not be exceeded by an average value of WET results for four representative samples, or a single representative sample. Non-RCRA fly ash, bottom ash, retort ash and baghouse waste from sources other than foundries containing hazardous constituents other than those listed in Table I-D CCWE shall be subject to the appropriate generic treatment standard(s) for those hazardous constituents or hazardous characteristics.
